

# NOVARUS GROUP

EXCELLENCE DELIVERED

## CAPABILITY STATEMENT

*Business Strategy · Operational Excellence · Transformation · AI & Automation*

### About Novarus Group

Novarus Group Pty Ltd partners with leadership teams to simplify business complexity and drive operational excellence across the full value chain — from strategy and transformation through to procurement, supply chain, planning and AI-enabled operations.

Founded and led by operators with over two decades of hands-on leadership in supply chain, procurement and operations, Novarus Group brings a practical, business-led approach: every engagement is tied to a measurable outcome in cost, service, growth or capability.

### Our Services

01

#### Business Strategy & Advisory

Defining strategic priorities, target operating models and executable growth plans for leadership teams.

02

#### Operational Excellence & Efficiency

Unlocking performance across people, process and systems — procurement, supply chain, planning and operations.

03

#### Transformation & Program Management

End-to-end delivery of complex transformation initiatives, from roadmap through to embedded change.

04

#### AI & Automation

Practical AI and automation solutions embedded into core operations to lift decision speed and productivity.

# Why Novarus

*Built by operators. Focused on outcomes, not theory.*

## Core Competencies

- Shaping business strategy and transformation — defining strategic priorities, aligning operating models, and translating strategy into clear, executable roadmaps.
- Transforming procurement functions end-to-end, including category strategy, tender design and execution, and functional team uplift.
- Optimising supply chain performance — visibility, resilience, network design and operational flow.
- Strengthening planning maturity, from demand planning through to S&OP/IBP and cross-functional forecasting.
- Elevating operational effectiveness, reducing waste and enabling teams to execute with clarity and confidence.

## What We Delivery

### Business Strategy & Advisory

Structured diagnostics of current-state performance, capability and risk, translated into target operating models and actionable roadmaps with clear governance and measurable outcomes.

### Operational Excellence & Efficiency

Procurement, supply chain, planning and operations uplift — improving visibility, reducing cost-to-serve, and building teams that execute with clarity and confidence.

### Transformation & Program Management

End-to-end delivery of complex initiatives — from business case and roadmap through to governance, stakeholder alignment and embedded, sustained change.

### AI & Automation

Intelligent process automation, AI-enabled forecasting and decision-support, and data governance — business-led and tied to cost, service or productivity outcomes.

### Certifications

Master of Business Administration · Executive Communication Specialist · Continuous Improvement Specialist · Lean Six Sigma (Yellow Belt) · Transport & Logistics Specialist

## Meet the Team

### Abdul Jaafar

**Founder & Managing Director**

Twenty-four years leading supply chain, procurement and operations transformation across major Australian and global organisations, translating strategy into sustainable, measurable results.
